Technology Partnering –
The Ninth Grove
Fuel Cell Symposium

4 – 6 OCTOBER 2005
QUEEN ELIZABETH II CONFERENCE CENTRE
LONDON

The text 'Powering the future...' is centered in the lower half of the page. It is written in a large, white, sans-serif font. The background is a vibrant blue sky filled with fluffy white clouds, which extends across the entire page.

Powering the future...

Fuel cell technology developments from around the world will be featured at a major dedicated event – the Ninth Grove Fuel Cell Symposium. In addition to a conference, the event features an exhibition, one-to-one partnering, and live demonstrations.

Fuel Cells are being developed for a wide range of applications from power generation and transport to portable devices. Major demonstration projects and commercial systems now in production underline the intent to develop future markets. Furthermore, the €3bn energy research budget announced by the European Commission underlines the commitment in Europe and includes the advancement of zero emission hydrogen technologies.

Adding value through partnering

Partnering is vital if organisations are going to be able to rise to the technological and commercial challenges of fuel cell development and commercialisation.

This year's Symposium introduces free partnering opportunities facilitated by the DTI Global Watch Service. Partnering enables organisations to identify and meet potential global partners, in order to find or exploit advanced technology.

How does partnering work?

Companies can assess the technology and partnering profiles of Symposium delegates before the event, and pre-arrange one-to-one meetings via the dedicated partnering website, www.fuelcellpartner.org

The process is simple:

- Complete the profile form attached or online
- Browse the list of potential partner profiles on the website
- Select the companies you wish to meet
- Each meeting is confirmed on your behalf with the company selected
- Visit the Partnering Desk on Stand A21 to collect your meeting schedule

We strongly recommend you book partnering meetings early, as demand is likely to be high and meeting space is limited. Requests will be dealt with strictly on a first-come first-served basis.

If you would like to attend the Ninth Grove Fuel Cell Symposium conference or exhibition you must register separately at www.grovefuelcell.com

About the DTI Global Watch Service

The DTI Global Watch Service provides support dedicated to helping UK businesses improve their competitiveness by identifying and accessing innovative technologies and practices from overseas. If you would like to discover how the DTI Global Watch Service can help your business, visit www.globalwatchservice.com or visit us at the exhibition on **Stand A21**.
